SUBJECT: Improvement of an Informal Parking Area on Pescadero Creek Road near Stage Road - Pescadero Area

We will be grading, rocking and installing curb stops to improve an informal parking area on Pescadero Creek Road near its intersection with Stage Road, which is adjacent to the Pescadero business district. The community of Pescadero is defined as a Rural Service Center in the County's Local Coastal Plan, and as such, it provides services to the surrounding agricultural area and also provides services for people visiting, traveling or recreating on the south coast.

The parking area improvements were requested by the Pescadero Municipal Advisory Council through the office of Supervisor Richard Gordon, as currently there is insufficient parking on Stage Road to meet the needs of the community. We also believe that it is important to keep the shoulders clear on Pescadero Creek Road since recreational bicyclists also frequent the area.

The work is estimated to cost \$17,500 and will be financed with 1/2 Cent Transportation Funds. There is no impact to the General Fund.

A Coastal Permit exemption has also been received for this work.

A handwritten signature in black ink, appearing to read "Neil R. Cullen".

Subject: Emergency Committee Report
Importance: High

Hi Catherine,

I cannot be at PMAC this evening because of a 6 to 9 teaching assignment at CSM.

Three items for an Emergency Report:

1. The first load of sandbags for winter have arrived at the high school. There is also a load of loose sand. I could not find the filler or the bags. They are on the way. I'll keep an eye on status and quality and communicate with Neil if and when we need more.
2. The 2M emergency communications repeater up at Fogline Nursery has, as far as I know, worked well all summer long. Coverage is great up through Loma Mar to the top of the hill, gets spotty down on Alpine Road into La Honda, and is good in La Honda all the way up 84 to Skyline. Great coverage in town and in Butano. Real bad down by Highway 1 and 84. Decent south to the light house. I've not been south of the light house since June, so I have no idea how far south the coverage goes. I do know we have a good strong signal over on 880 in Oakland--this development was not planned.

There is in informal local 2M net that runs on Monday evenings at 8 PM. It started after I returned to teaching duties, so I don't know the details or who runs it--all I know is that Loma Mar, Dearborn, Pescadero, La Honda, and Butano are represented.

Work remaining to secure emergency communications before the winter:

1. Install web straps to secure antenna
2. Install backup battery on main radio
3. Install backup battery on control radio
4. Install ground rod and lightening protection on both antenna systems

I expect winter coverage to change some because a 2M signal reflects off heavy storm clouds differently than off of blue sky or high overcast. Coverage changes will occur and will get mapped.

3. I've contacted Tim Beard at LHPUSD for permission to fix the antenna at the high school 2M station--that's our emergency shelter radio. Permission was given and I'm scheduling an event for a weekend day in late Oct. We discovered the antenna issue during the Alto Vello bike race in June. We've determined that the radio is OK. The problem is either feed line or antenna--most likely water damage. Repair parts are on hand so cost is zero and time involved is most likely 1/2 day.

Please email any action items.

Thanks.

Roy Brixen
